

## Adding and Subtracting

When a child first starts to add or subtract a helpful tool is a Number Line. With a number line you will visualize the problem much better.

If your problem was 7 plus 3, you would start at the 7 and count 3 spaces to the 10. Finding that 7 plus 3 equals 10.

If it had been a subtraction problem, 7 minus 3, you would start at the 7 and move 3 spaces to the left and you would find the answer is 4.

With this visual tool many children see the addition and subtraction process better.
